Subject Index for Volume 17

Acetate
in symptomatic hypotension during hemodialysis 571
Acetazolamide
role in renal bicarbonate reabsorption 577
Acid-base balance
after renal mass reduction 595
collecting duct response to disturbances of . . . 326
Acidemia
effect on distal nephron H^+ secretion 615
Acidosis
ammonia metabolism in 595
ammonia production in 57
hypertriglyceridemia and lipid metabolism in (abst) 407
metabolic *a.*
collecting duct response to 326
renal changes in 312
role of lithium in 196
Adenine nucleotides
in acute renal failure recovery 338
Adrenal glands
angiotensin analog effect on 66
Adrenal hormone
in acute potassium tolerance 586
Adrenergic system
beta$_1$ receptors in tubular cell membrane 764
effect on mineralocorticoids and sodium metabolism 263
Adrenocorticotropic hormone
effect on plasma aldosterone in sickle cell disease 118
Alanine
effect on Necturus kidney 479
Albuminuria
and glomerular permselectivity in cardiac failure . 507
in diabetic nephropathy 669
Aldosterone
angiotensin III's effect on secretion of 66
in hyperkalemia of chronic renal insufficiency . . 89
in potassium homeostasis 586
in sickle cell disease 118
sodium metabolism and 263
Alkalemia
effect on distal nephron hydrogen ion secretion . 615
Alkaline phosphatase
as marker for renal disease 242
Alkaline
urine control of urine-blood P_{CO_2} in 31
Alkalosis, metabolic
collecting duct response to 326
Allograft rejection, *See also* Transplantation
humoral presensitization and 638
Aluminum
in brain and whole body; PTH effect on 40
Amino acids
renal transport of (abst) 399
ureagenesis and 709
therapy; in acute renal failure in rat 14
Aminoglycosides
effect on alkaline phosphatase in renal disease . 242
and urinary β_2-microglobulin excretion 654
Ammonia
in diabetic ketoacidosis 57
excretion of, in renal insufficiency 595
genesis of, in metabolic acidosis 312
Amyloidosis, renal
acquired factor XII deficiency in (abst) 705
Analgesic abuse
capillary sclerosis of urinary tract in (abst). . 412, 859
effect on kidney 250
Anemia
of dialysis; bone-marrow iron stores in 237
erythropoietin deficiency and pathogenesis of (abst) 398
hemodialysis for, effect on erythropoietin 382
Angiotensin, *See also* Renin-angiotensin
adrenal, renal, and vascular responses to 66
analog of, vs. converting enzyme inhibitor in hypertension 647
Angiotensin II
effect on plasma aldosterone in sickle cell disease 118
in PGE_2 biosynthesis 277
and renal hemodynamics of obstructive jaundice 223
role in renal vasoconstriction (abst) 863
Angiotensin III analog
effect on aldosterone secretion 66
Anticonvulsant drugs
effect on bone disease 677
Antidiuretic hormone
effect on water-permeability of rectum in Brattleboro rat (abst) 416
in glucocorticoid deficiency 186
syndrome of inappropriate secretion of 554
Antigens
in glomerular mesangium 141
HLA, atopy, and cyclophosphamide in nephrotic syndrome 113
Antihypertensives
comparison of (abst) 862
Arginine vasopressin, plasma
in glucocorticoid deficiency 186
Aspirin
and nephropathy 250
Assays
to detect transplant rejection 638
to measure antibodies to glomerular basement membrane (abst) 420
Atopy
HLA and cyclophosphamide in nephrotic syndrome 113

Bartter's syndrome
familial case of (abst) 700
red blood cell cation transport in (abst) 420

Basaljel®
vs. Controphos™ for uremia 528
Basement membrane
in glomerulopathies (abst) 397
mesangial function and (abst) 412
Berger's disease
HLA phenotype in (abst) 702
Bicarbonate
dialysis with, effect on serum lipids (abst) 409
infusion in postischemic renal failure (abst) . . . 416
in renal handling of phosphate 749
renal reabsorption at different GFR's 577
urinary *b.*; urine-blood P_{CO_2} and 31
Bile duct ligation
and renal perfusion in obstructive jaundice . . . 223
Blood group antigen A
in normal and pathologic kidneys 820
Blood pressure
late effect of lead intoxication on 430
Bone-marrow iron, *See* Iron, bone-marrow
Brain aluminum
PTH effect on 40
Butyrate
effect on Necturus kidney 479

C3 nephritic factor
antibody nature of (abst), ... 864
Calcitonin
effect on electrolyte excretion in rabbit 473
Calcium
in cholinergic inhibition of urinary acidification . 622
effect of PTH and calcitonin on excretion of . . . 473
transport; effects of uremia and dietary calcium (abst) 410
Calcium nephrolithiasis
prevention of (abst) 698
uric acid saturation in 662
urinary zinc excretion in (abst) 698
Captopril
action of (abst) 861, 863
in hypertension (abst) 696
vs. saralasin for hypertension 647
Carbachol
effect on urinary acidification, in turtle bladder . 622
Carbon dioxide tension
in alkaline urine, control of 31
Carbonic anhydrase
intracellular distribution in rat kidney 162
in renal bicarbonate reabsorption 577
Cardiac arrhythmias
and hemodialysis 811
Cardiac disease, cyanotic congenital
renal function in (abst) 856
Cardiac failure
albuminuria and glomerular permselectivity in . . 507
Cardiac output
in obstructive jaundice 223
Carotid artery occlusion
intrarenal blood flow after (abst) 858
Cefoperazone
for renal insufficiency (abst) 857
Cell migration
and middle molecules of uremia 231
Chloride
effect of PTH and calcitonin on excretion of . . . 473
Cholinergic agents
and urinary acidification in turtle bladder 622
Chondriome
of tubules, morphology 175
Chorambucil
to treat frequent relapsing pediatric nephrotic syndrome (abst) 695
Collecting duct
response to electrolyte disturbances 326
Complement activation
in membranous and membranoproliferative glomerulonephritis 535
Controphos™
for uremia 528
Corpuscle, renal
morphometry of, in postnatal growth and compensatory hypertrophy 438
Cortex, renal
transport processes in (abst) 402
Cortical collecting tubule, *See* Tubules
Corticosterone therapy
for impaired water diuresis of glucocorticoid deficiency 186
Cyclic adenosine monophosphate
effect of water diuresis, vasopressin, and hydrochlorothiazide on (abst) 406
Cyclophosphamide
and HLA and atopy in steroid-responsive nephrotic syndrome 113
Cysts
ultrastructure and function of, in adult polycystic kidney disease 372

Deoxycorticosterone acetate
sodium metabolism and 263
Dexamethasone in PGE_2 biosynthesis 277
Dextrans
clearances, in diabetic nephropathy 669
Diabetes acidosis
renal ammonia production in 57
Diabetic nephropathy
proteinuria and glomerular barrier in 669
Dialysate
effect of overheating (abst) 706
Dialysis, *See also* Hemodialysis, etc.
aluminum toxicity from PTH effect on 40
hypertension in, and thyroid function (abst) . . . 698
middle molecules of uremia and 82
peritoneal *d.*, continuous ambulatory
complications during (abst) 856
high-risk patients on (abst) 864
protein loss in (abst) 860
systemic fibrinolytic potential during (abst) . . . 694
recirculation *d.*, alternate to hemofiltration (abst) 406
Diet
in uremic children, effect on protein turnover . . 837
Digoxin
and cardiac arrhythmias in chronic hemodialysis 811
renal arterial blood pressure and (abst) 413
Disequilibrium syndrome, dialysis
cause of (abst) 412

Disodium ethane-1-hydroxy-1-1-diphosphonate
and phosphate toxicity 722
Diuresis
nature of (abst) 703
Diuretics
antihypertensive mechanism of (abst) 406
and electrolyte cotransport (abst) 405
optical isomers of new drug (abst) 405

Electrolytes
effect of PTH and calcitonin on excretion of . . . 473
in uremia 364
Electrophysiology
of cortical collecting tubule 74
Emotional dehiscence
after successful renal transplantation 388
Enzymes
in renal disease 242
Epithelial transport
in cortical collecting tubule 74
in kidney and intestine (abst) 400
in rat intestine; sodium and mineralocorticoids
(abst) 402
structural characteristics of (abst) 398
in submaxillary duct (abst) 409
Epithelium
culture of, for proliferative growth (abst) 408
Erythropoietin, serum
in anemia treated by hemodialysis 382
Essential mixed cyroglobulinemia
monoclonal rheumatoid factor in (abst) 694
Ethchlorvynol
resin hemoperfusion for toxicity of 303
Extracellular fluid volume
effect on proximal urate and water absorption . . 155

Familial dysautonomia
renal disease in 102
Ferritin, serum
in anemia of dialysis 237
Fre Amine®
for acute renal failure 14
Free water clearance
effect of prostaglandins on 24
Furosemide
protective effects in acute ischemic renal failure 455

Glomerular renal amyloidosis
structure and function correlation in (abst) . . . 405
Glomerulonephritides
nephritic factor and anticomplement activity in
(abst) 695
tissular fibrinolysis in (abst) 697
Glomerulonephritis
idiopathic *g.*, circulating immune complexes in
(abst) 419
immune complex *g.*
drug treatment of (abst) 864
in situ complex formation 1
McDuffie's syndrome in (abst) 705
membranous and membranoproliferative *g.*, control of complement activation in 535
minimal change *g.*, humoral and cellular immunity in (abst) 695
proliferative *g.*, and sodium excretion (abst) . . 700
protective effect of dietary phosphorus restriction in 293
serum immunoglobulins in (abst) 420
tissue culture of glomeruli in 515
Glomerulopathy
familial type; fibrillar transmembranous deposits
in (abst) 856
immunology of, in situ complex formation . . . 1
Glomerulosclerosis
diabetic *g.*, pathogenesis of (abst) 414
familial dysautonomia and 102
Glomerulus
aglomerular pathways in vasculature of aged rats
(abst) 700
assay for measuring circulating antibodies to
basement membrane of (abst) 420
GFR and renal bicarbonate reabsorption 577
in glomerulonephritis, tissue culture study . . . 515
hemodynamics of, before and after 24-hr bilateral
ureteral obstruction 491
immune complexes at, in serum sickness 631
mesangium; structure and function of 141
permselective properties of, in cardiac failure . . 507
piscine *g.*, effect of variation in salinity (abst) . . 419
in postnatal growth and compensatory hypertrophy of renal corpuscle 438
and protein selectivity (abst) 402
Glucocorticoid deficiency
plasma arginine vasopressin in 186
Glucose
absorption in Necturus kidney 479
Glutamate
effect on Necturus kidney 479
N-acetyl *g.*, ureagenesis and 709
L-Glutamic acid
sodium-dependent uptake of (abst) 403
Glutamine
effect on Necturus kidney 479
ketone bodies effect on 57
in metabolic acidosis 312
Gold nephropathy
role of mesangium in (abst) 401
Gonadal dysfunction
in renal failure (abst) 411

Hemodialysis, *See also* Dialysis
and aluminum hydroxide gels for dialysis encephalopathy (abst) 702
for anemia, effect on serum erythropoietin . . . 382
bicarbonate *h.*, in a sorbent regenerative dialysis
system (abst) 699
cell-mediated immunity and (abst) 697
chronic *h.*,
cardiac arrhythmias and 811
hyperprolactinemia in (abst) 858
muscular work capacity and oxygen transport
in (abst) 704
cyst and stone formation in (abst) 403

electrolyte composition and total body water in patients on . . . 364
hemodynamic, acid-base, and osmolality studies in (abst) . . . 406
hemodynamics during . . . 801
hemofiltration vs. (abst) . . . 409, 417
hypoxemia prevention in (abst) . . . 701
maintenance *h.*, effect on serum ferritin and bone-marrow iron . . . 237
noradrenaline and hemodynamics during (abst) . 404
patients and their partners, national survey . . . 350
protein turnover and, in uremic children . . . 837
and sequential ultrafiltration
duration of treatment in (abst) . . . 858
hemodynamics . . . 801
symptomatic hypotension during . . . 571
Hemofiltration
at home, for terminal uremia (abst) . . . 702
high-flux *h.*
vs. hemodialysis, blood pressure and vascular resistance in (abst) . . . 701
post dilutional (abst) . . . 704
and intestinal recirculation (abst) . . . 411
new method, metabolic and hemodynamic parameters (abst) . . . 398
Hemolytic-uremic syndrome
clinical course of (abst) . . . 397
postpartum (abst) . . . 705
renal pathology of (abst) . . . 400
Hemoperfusion, resin
to remove ethchlorvynol . . . 303
Hemorrhage
and renal hemodynamics of obstructive jaundice 223
HLA
atopy and cyclophosphamide in nephrotic syndrome . . . 113
Hormone degradation, renal
in isolated perfused rat kidney (abst) . . . 415
Hydrogen ion secretion
in acidosis; lithium and . . . 196
in cholinergic inhibition of urinary acidification . 622
of distal nephron, effect of blood pH . . . 615
in renal bicarbonate reabsorption . . . 577
Hydropenia
ammonia metabolism in . . . 595
Hydrostatic pressure
effects on ultrastructure of proximal tubule . . . 732
β-Hydroxybutyrate
renal ammonia production and . . . 57
Hyperaldosteronism
and hypertension, diagnosis of (abst) . . . 401
Hypercalciuria, idiopathic
diagnostic approach (abst) . . . 858
Hyperkalemia
aldosterone deficiency in . . . 89
and hyporeninemic hypoaldosteronism . . . 118
Hypernatremia and GFR (abst) . . . 403
Hyperparathyroidism
in early renal failure (abst) . . . 411
in renal osteodystrophy . . . 677
Hypertension
arachidonic acid metabolism in; fibroblast model (abst) . . . 859
arterial *h.*, and arteriovenous fistula (abst) . . . 700
effect of beta-blocking agents on (abst) . . . 405
hypercalcemic *h.*, mechanism of (abst) . . . 859
lead intoxication and . . . 430
noradrenergic activity in (abst) . . . 410
one-kidney model, micropuncture study (abst) . 416
in pregnancy, Labetalol to treat (abst) . . . 701
salivary kallikrein excretion in (abst) . . . 397
saralasin vs. captopril for . . . 647
Hyperuricosuria
in calcium nephrolithiasis . . . 662
Hypoaldosteronism
hyperkalemia and hyporeninemia in . . . 118
Hypokalemia
chloride reabsorption in (abst) . . . 862
Hyponatremia
in syndrome of inappropriate antidiuretic hormone secretion . . . 554
Hyporeninemia
in hypoaldosteronism, hyperkalemia in . . . 118
Hypotension
during hemodialysis . . . 571
and renal dysfunction in familial dysautonomia . 102

IgA glomerulonephritis
and arterial hypertension (abst) . . . 695
IgA nephropathy
single entity? (abst) . . . 696
Ionic transport
hydrostatic pressure changes in tubules and . . . 732
intracellular elements of . . . 756
in uremia . . . 364
Immune complexes
circulating *i.c.*, in adult idiopathic nephrotic syndrome . . . 545
in passive serum sickness . . . 631
in situ formation in glomerular disease . . . 1
Immunology
anti-T-cell action in nephritogenic antibodies (abst) . . . 864
of adult idiopathic nephrotic syndrome . . . 545
of alkaline phosphatase in renal disease . . . 242
of glomerular disease, in situ complex formation 1
of glomerular mesangium . . . 141
of membranous and membranoproliferative glomerulonephritis . . . 535
of passive serum sickness . . . 631
role of platelets in vascular permeabilization and phlogosis (abst) . . . 694
of Tamm-Horsfall protein . . . 284
Inner ear dysfunction
in uremia, etiology of (abst) . . . 401
Insulin
in acute potassium tolerance . . . 586
Interferon
immunosuppresion and (abst) . . . 865
Iron, bone-marrow
in anemia of dialysis . . . 237
Isotonic volume expansion
hemodynamics after (abst) . . . 401

Jaundice, obstructive
altered renal perfusion in early stage of . . . 223

Kallikrein-kinin system, renal
control of blood pressure and (abst) 397
effect on mineralocorticoids and sodium metabolism 263
parotid *k.*, drug effects on excretion of (abst) . . 414
Ketoacidosis
renal ammonia production in 57
α-ketoglutarate
in metabolic acidosis 312

Lactate
effect on Necturus kidney 479
Lead intoxication
late effects on kidney function and blood pressure 430
Leptospirosis
pathogenesis of renal disease in 827
Leukocytes
in uremia, effect of middle mol wt solutes on . . 231
Lithium
effect on renal gluconeogenesis (abst) 417
effect on urinary acidification 196
long-term effect on kidney function (abst) 408
Liver
and renal hemodynamics of obstructive jaundice 223
ureagenesis in 709
Loop of Henle, ascending limb
prostaglandins effect 24
Lumen-positive potential
of cortical collecting tubule 74
Lupus
in NXB × NZW mice (abst) 701
Lupus nephritis, proliferative
long-term evolution of (abst) 703
Lymphoma
renal failure in 847
Lysine
effect on Necturus kidney 479

Magnesium transport
metabolic acidosis and alkalosis effects on (abst) 859
Magnesium chloride
in acute renal failure recovery 338
Malakoplakia, bilateral renal
review of (abst) 702
Malate
in metabolic acidosis 312
Maleate
effect on adenosine and adenine nucleotides (abst) 413
proteinuria induced by, effect on tubules 771
Maltase
neutral *m.*, brush border action of (abst) 409
in renal brush border (abst) 418
Mannitol
and renal concentrating ability 205
Medullary collecting duct
cell types and morphology after potassium depletion 45
α-Mercapto-propionyl-glycine
nephrotic syndrome induced by (abst) 409
Mesangium, *See* Glomerulus
Metabolic acidosis, *See* Acidosis
Metabolic alkalosis, *See* Alkalosis
β_2-Microglobulin
urinary excretion of, in aminoglycoside therapy . 654
Middle molecules
in uremia 82, 231
Mineralocorticoids
escape from sodium-retaining effects of 263
Mitochondria
morphology of, new staining technique 175
Morphology
of glomerular mesanguim 141
of medullary collecting duct cells 45
of mitochondria of rat 175
Myeloma
light-chain m., glomerular changes in (abst) . . . 706

National Kidney Foundation
need for faculty members in renal research . . . 135
Natriuretic hormone
and mineralocorticoids 263
Necturus kidney
hydrostatic pressure changes in ultrastructure of 732
organic substrate effects on 479
Nephramine
for acute renal failure 14
Nephrectomy
effect on phosphate transport in proximal tubule 788
morphometry of renal corpuscle after, ... 438
Nephritis
nephrotoxic serum *n.*, dietary phosphorus restriction effect on 293
tubulointerstitial immune complex *n.*, and Tamm-Horsfall protein 284
Nephrons
ammonia excretion by, in renal insufficiency . . 595
bicarbonate and phosphate handling in 749
carbonic anhydrase activity in 162
distal *n.*, effect of blood pH on hydrogen ion secretion 615
Nephrosclerosis
postpartum (abst) 703
Nephrotic syndrome
adult *n.s.*, circulating immune complexes in . . . 545
childhood *n.s.*, steroid-responsive type: HLA, atopy, and cyclophosphamide in 113
thromboses and emboli in (abst) 411
Nitrogen, dietary
ureagenesis and 709
Noradrenaline
and renal hemodynamics of obstructive jaundice 223

Organic substrates
effect on Necturus proximal tubule function . . . 479
Osmolality
in PGE_2 biosynthesis 277
Osteitis fibrosa
effects of vit. D metabolites and chronic hemodialysis (abst) 703
Osteodystrophy, renal
Nephrology Forum on 677
Ozolinone
diuretic action of (abst) 407
optical isomers of (abst) 405

Papillary necrosis and analgesic abuse 250
Paracellular shunt
effect of hydrostatic pressure changes on 732
Paracetamol
and nephropathy 250
Parathyroid hormone
cyclic guanosine monophosphate effect on, in renal tubules (abst) 696
effect on brain and whole body aluminum 40
effect on electrolyte excretion in rabbit 473
effect on phosphate transport in proximal tubule 788
heterogeneity of and methodologic problems in renal failure (abst) 696
and phosphaturia 749
in renal osteodystrophy 677
Passive serum sickness
immunology of 631
Percodan®
analgesic nephropathy and 250
Pericarditis, uremic
immunology of (abst) 411
pH, blood
effect on distal nephron hydrogen ion secretion . 615
Phosphate
after adrenalectomy (abst) 405
bicarbonate and renal handling of 749
effect of PTH and calcitonin on excretion of . . . 473
proximal tubule transport of 788
in renal mass reduction (abst) 856
renal response to, in phosphate restriction (abst) 860
retention of, in renal osteodystrophy 677
toxicity of, in rats 722
tubular reabsorption after fasting (abst) 861
Phosphate binder
for uremia 528
Phosphorus, dietary
restricted in glomerulonephritis, protective effect of 293
Phenacetin
and nephropathy 250
Placidyl®, *See* Ethchlorvynol
Plasma exchange
and pathogenesis of renal disease (abst) 398
Plasma membranes
lateral-basal *p.m.*, method for isolation of (abst) 414
Plasma separation
to treat rapidly progressing glomerulonephritis (abst) 416
Platelet adenyl cyclase activity
from hemofiltrate (abst) 415
Polycystic kidney disease, adult
ultrastructure and function of cysts from 372
Potassium
acute tolerance of, cause of 586
in chronic renal insufficiency, role of aldosterone 89
in hemodialysis; cardiac arrhythmias with 811
imbalance, collecting duct response to 326
medullary collecting duct response to 45
in PGE_2 biosynthesis 277
renal tubular control of (abst) 397
in sickle cell disease 118
Preeclampsia
antigens in (abst) 705
Pregnancy
toxemic *p.*,
renal function and (abst) 706
renin, aldosterone, and dopamine-β-hydroxylase in (abst) 698
vascular-renal diseases in (abst) 704
Progressive renal insufficiency
lead intoxication and 430
Prostacyclin
and renin release in man (abst) 697
Prostaglandins
in acute ischemic renal failure treated by furosemide 455
and dietary sodium restriction (abst) 416
effect on mineralocorticoids and sodium metabolism 263
effect on NaCl transport in diluting segment . . . 24
effect on renal blood flow (abst) 412
formation and action of (abst) 400
and salt and water balance in healthy man (abst) 411
and substance P (abst) 404
in urine and water excretion (abst) 415
Prostaglandin E_2
biosynthesis of 277
Protease digestion
in proximal tubules and intestinal brush border membranes (abst) 414
Protein
diet: and renal concentrating ability by urea . . . 205
flux, in uremic children 837
Proteinuria
changes in glomerular capillary wall and (abst) . 694
experimental and clinical studies on (abst) . . . 399
and glomerular barrier in diabetic nephropathy . 669
in glomerular disease, mechanism of 1
and glomerular permselective properties in cardiac failure 507
induced by maleate, effect on tubules 771
screening test for selective vs. nonselective type (abst) 413
Proximal tubule, *See* Tubules
Psychologic problems
after renal transplantation 388
Pyelonephritis, chronic
autoimmune reactions in (abst) 408

Renal concentrating mechanism
urea and 205
Renal disease
alkaline phosphatase isoenzyme pattern in . . . 242
and blood group antigen A 820
familial dysautonomia and 102
in leptospirosis, pathogenesis of 827
phosphate toxicity and 722
study of various drug effects on (abst) 409
Renal failure
in lymphoma 847
ureagenesis in 709
acute *r.f.*
amino acid therapy for 14
effect of furosemide and 5/6 nephrectomy on (abst) 412
enhanced recovery from 338

feedback activation in 497
and indomethacin therapy (abst) 699
ischemic type, development of and protection against (abst) 400
ischemic type, oliguria and prostaglandins in (abst) 404
proteinaceous casts in (abst) 417
protein catabolism in (abst) 407
renin-angiotensin system in 465
chronic *r.f.*
adolescent growth and puberty in boys with (abst) 415
cardiac changes in (abst) 704
glycosylated hemoglobin in (abst) 417
and middle molecules in uremia 82
PTH toxicity in (abst) 413
end-stage *r.f.*
bone marrow cellularity and stem cell mass in (abst) 408
oliguric ischemic *r.f.*
prostaglandin-independent protection by furosemide in 455
Renal insufficiency
ammonia excretion in 595
chronic *r.i.*
new phosphate binder for 528
aldosterone deficiency in hyperkalemia of . . 89
Renal research
need for faculty members in 135
Renin
angiotensin analog effect on 66
effect of renal artery constriction on (abst) . . . 860
regulation of, and sodium balance 607
Renin-angiotensin system
in acute renal failure 465
effect on mineralocorticoids and sodium metabolism 263
in hypoaldosteronism of chronic renal insufficiency 89
and sodium balance (abst) 408
Respiratory acidosis
collecting duct response to 326

Saralasin
vs. captopril for hypertension 647
Sexual dysfunction
in dialysis
reversal of (abst) 402
role of $1,25(OH)_2D_3$ in (abst) 404
in patients with uremia 388
Sickle cell disease
hyperkalemia in 118
Skin exudate
and middle molecules of uremia 231
Sodium
effect of PTH and calcitonin on excretion of . . . 473
homeostasis set point 423
and renin regulation 607
retention of, and mineralocorticoids 263
Sodium chloride transport
in acidosis, effect of lithium 196
in cortical collecting tubule, electrophysiology of 74
in diluting segment, prostaglandins effec' 24

Solutes, *See* Middle Molecules
Stones, renal
activity-concentration curves for inhibitors and promoters of (abst) 420
diet and calcium excretion in (abst) 418
uric acid saturation in formation of 662
Sympathetic nervous system
effect on kidney 764
Syndrome of inappropriate antidiuretic hormone secretion
Nephrology Forum on 554

Tamm-Horsfall glycoprotein
in renal disease (abst) 419
tubulointerstitial immune complex nephritis and 284
Theophylline
effect on water, electrolyte, and protein excretion (abst) 700
β-Thromboglobulin
renal function and (abst) 403
Thrombosis
in primary nephrotic syndrome and renal amyloidosis (abst) 699
Ticrynafen
a uricosuric diuretic (abst) 862
Tizolemide
saluretic action of (abst) 403
Tolazoline
effect on renal function (abst) 860
Transplantation, kidney
computer-assisted isotopic renography to assess (abst) 857
dermatologic complications after (abst) 857
differential diagnosis of hypertension after (abst) 407
effect of propanolol on parathormone and calcitonin 695
emotional dehiscence after 388
interstitial nephropathy or arteritis after autoimmunity and (abst) 418
kidney preservation, extending time of (abst) . . 865
pyelonephritis and (abst) 858
rejection
protection against (abst) 865
role of humoral presensitization 638
Tubular acidosis
role of lithium in 196
Tubular cell membrane
β_1-adrenergic receptors in 764
Tubular flow rate
effect on proximal urea and water absorption . . 155
Tubules, renal
carbonic anhydrase activity in 162
cortical collecting *t.*, electrophysiologic study of 74
intracellular elements in 400 (abst) 756
new technique to study morphology of 175
protein handling by 771
proximal *t.*
aminoglycoside effect on 654
function in Necturus kidney 479
hydrostatic pressure effects on ultrastructure of 732
phosphate transport in 788

urate and PAH transport in, in pig (abst) . . . 860
urate and water absorption in 155
Tubuloglomerular feedback
in acute renal failure 497
Tubulointerstitial nephritis
cellular immunity in (abst) 401

Urate
absorption in proximal tubule 155
Urea
genesis of 709
renal concentrating ability by 205
Uremia
aluminum toxicity in dialysis 40
in children
effects of diet and hemodialysis on protein turnover in 837
hypothalamus-hypophyseal axis in (abst) . . . 697
electrolyte composition and total body water . . 364
chronic *u.*, membrane transport in (abst) 418
glycogen-protein complex in (abst) 414
Uremia
middle mol wt solutes in (abst) 82, 231, 699
new phosphate binder for 528
protein and glycogen metabolism in (abst) 406
vit. D and high-magnesium diet in (abst) 861
Uremic syndrome
role of PTH (abst) 398
Uric acid
in calcium nephrolithiasis 662
Ureteral obstruction, bilateral
glomerular hemodynamics before and after . . . 491
Urinary acidification
carbonic anhydrase activity in 162
cholinergic inhibition of, in turtle bladder 622
effect of changes in blood hydrogen ion concentrations on 615
role of lithium in 196
Urinary bicarbonate
urine-blood P_{CO_2} and 31
Urinary excretion
electrolytes; effect of PTH and calcitonin on . . 473
and renal concentrating ability by urea 205
in renal disease; alkaline phosphatase in 242
Urinary tract infection
in children; treatment of (abst) 857
immunology of (abst) 413

Vasculitis
circulating immune complexes in (abst) 419
Vasopressin, *See also* Arginine vasopressin
biologically active analogues of (abst) 418
Vitamin D
metabolism of
in renal insufficiency (abst) 399
in renal osteodystrophy 677
metabolites; to treat PTH-independent renal phosphate wasting (abst) 417

Water
abnormal diuresis; plasma arginine vasopressin in 186
absorption, in proximal tubule 155
total body *w.*, in uremia 364
transport of, effects of aminoglycoside amikacin on (abst) 702
Wegener's granulomatosis
ureteral involvement in (abst) 704

Xenogenetic perfusion
renal blood flow and (abst) 407
